Deactivate Secure Email Threat Defense

Message Source: Microsoft 365

To deactivate Secure Email Threat Defense when you have Microsoft as your message source, there are two main tasks:

- Delete your Secure Email Threat Defense journal entry from Microsoft 365 Admin Center

- Delete the Secure Email Threat Defense application from your Microsoft Azure tenant

Delete Your Secure Email Threat Defense Journal Rule

To delete your Secure Email Threat Defense journal rule:

1. Go to your Microsoft 365 Admin Center https://admin.microsoft.com/AdminPortal/Home#/homepage.

2. Navigate to **Admin centers** > **Compliance** > **Data lifecycle management** > **Exchange (legacy)** > **Journal rules**.

3. Select the Secure Email Threat Defense journal rule, then click **Delete**. Select **Yes** to confirm you want to delete the journal rule.

Delete the Secure Email Threat Defense Application from Azure

To delete the Secure Email Threat Defense application from Azure:

1. Go to portal.azure.com.

2. Search for and select **Enterprise applications**.

   Note: If you are using an older view in Azure, this may be called **App registrations**.

3. Locate and select the **Cisco Secure Email Threat Defense** and/or **Cisco Secure Email Threat Defense (Read Only)** application.

4. In the left pane, select **Properties**.

5. Click the **Delete** button, then select **Yes** to confirm you want to delete the Secure Email Threat Defense app.

Message Source: Gateway

To deactivate Secure Email Threat Defense when you are using a Gateway as your message source, there are two main tasks:

- Configure your Gateway to stop sending messages to Secure Email Threat Defense

- Delete the Secure Email Threat Defense application from your Microsoft Azure tenant (not necessary for No Authentication mode)

Configure your Gateway to Stop Sending Messages

To configure your Gateway to stop sending messages to Secure Email Threat Defense:

1. In your Secure Email Cloud Gateway console, go to **Security Services** > **Threat Defense Connector**.

2. Set **Threat Defense Connector** to **Disabled**.

Delete the Secure Email Threat Defense Application from Azure

To delete the Secure Email Threat Defense application from Azure:

1. Go to portal.azure.com.

2. Search for and select **Enterprise applications**.

   Note: If you are using an older view in Azure, this may be called **App registrations**.

3. Locate and select the **Cisco Secure Email Threat Defense** and/or **Cisco Secure Email Threat Defense (Read Only)** application.

4. In the left pane, select **Properties**.

5. Click the **Delete** button, then select **Yes** to confirm you want to delete the Secure Email Threat Defense app.
