New and Changed Information

The following table summarizes the new and changed commands in Cisco ISE Release 3.2:

Table 1: New and Changed Commands in Cisco ISE Release 3.2

Command	Description
clock timezone	The **no** form of this command is no longer supported.
conn-limit	This command is modified to include assigning a name for the conn-limit that you configure.
copy	The command is modified to no longer support copying running configuration and startup configuration functions.
idle-timeout	Added in Cisco ISE Release 3.2 and replaces the **terminal session-timeout** command.
password	This command is modified. To create a password with the hash symbol (#) or exclamation mark (!), you must first enter the backslash symbol (\), for example, **abc\!23**, **abc12\#**, and so on.
rate-limit	The **rate-limit** responses no longer display the rounded off rate limit value. However, Netfilter continues to round off the rate limit value in implementation.
reload	This command is modified to include the *cli* variable.
service	The command is modified to include the **PubkeyAuthentication** keyword.
show disks	This command is modified to no longer support the *filename* variable.
show esr status	Added in Cisco ISE Release 3.2.
show icmp-status show interface show inventory show logging show ports show process	For these commands, the output modifier to file has been changed.

show startup-config	Removed from Cisco ISE Release 3.2.
screen-length	Added in Cisco ISE Release 3.2 and replaces the command terminal length.
screen-width	Added in Cisco ISE Release 3.2.
synflood-limit	The running-config response for synflood-limit no longer displays the rounded off limit value. However, synflood limits continue to be rounded off in implementation.
terminal session-timeout	Removed from Cisco ISE Release 3.2.
terminal length	Removed from Cisco ISE Release 3.2.
terminal session-welcome	Removed from Cisco ISE Release 3.2.
who	Added in Cisco ISE Release 3.2.
write	Removed from Cisco ISE Release 3.2.
